(New York World,) One of the most disgraceful scenes discredit upon the police department, was witnessed by a large growd of people on Bleecker street, within a stone's throw of the marble building, about 10:30 'clock last night. He held that it was the duty of the Chamber to maintain upon a solid basis the lasting harmony between the public powers. It was also to the interest of the nation that the authority of legislative power should in its turn be shaken just after the prestige of Executive power had been happily established. He concluded by saying that the questions touching political procedure had but slight interest for the nation at the present time. It was therefore necessary for the Chamber to occupy itself with questions of finance, industry, and com-merce, the welfare of the working classes, military organization, and the internal situation. "Why," he asked, should we not be able to come to an agreement upon these questions since we all equally desire justice, while in the negotiations regarding external interests we are actuated by loyalty to the people BANK STOCES. New York, January 12.—The stock market today was duller than on any day during the preent depression in business at the Stock Exchange, and the amount of interest in trading
may be seen from the fact that nearly one half
of the entire day's business was in Reading.
Traders were bearishly inclined, but were too
cautious to sell the list shout. They did set
prices off a chade later in the day, but the result
of the day's operations is cuttively insignificant.
There was some little animation to St. Paul on
some buying by larger traders. In the forencon
an appearance of strength was given this stock,
but it dropped with the rest of the list toward
the close. Outside of the two stocks mentioned
there was literally nothing in the market, some
of the stocks which have lately been prominent
for activity not recording a single sale throughout that day. The close was cull and heavy at
acoust the lowest prices reached. The sales aggregated 24.000 shares.
